

# Jayden Leuciuc

---

## About:

A react developer looking for a front-end / full-stack web developer position. I have created several open source projects to showcase my work.

---

Email | Github | LinkedIn | Website

---

## Skills:

React, Sass, Node.Js, Express.Js, Html, Css, MongoDB, Git

---

## Experience:

December 2019- Present

### E-Commerce Clerk

- Increased the department's productivity significantly through recorded statistics and metrics.
  - Adhered to set procedures when processing orders through a POS.
  - Raised customer satisfaction rate through critical thinking skills with communication.
  - Trained new employees and kept the team up-to-date on new procedures.
  - Inspired new policies to be used by the department.
- 

## Projects:

### Password Manager Service Webpage

- This project was built using React, Sass, and Git
- I learned about components and how to incorporate them into a webpage.

### Construction Company Landing Webpage

- This project was built using React, Sass, and Git
- I learned how to use react with sass and hosting projects with react.

### Covid Tracker App

- This project was built using React, Sass, and Git
  - I learned how to pull information from an api and display it on charts.
- 

## Education:

### Farragut High School

GPA: 4.0 / 4.0
