Jayden Leuciuc

About:

I'm a self taught developer located in Knoxville, Tennessee. I focus on front end web development, but I am comfortable with full stack applications.

Email | Github | LinkedIn | Website

Skills:

React.Js, Sass, Node.Js, Express.Js, Typescript, Html, Css, MongoDB, GraphQl, Git

Projects:

Github User Search App | **Code** | **Preview**
- This project was built using React, GitHub Api, Auth0, Fusion charts, and Git
- I learned how to destructure data given from the GitHub api, design an authentication system with Auth0, style information with fusion charts, and host project data on GitHub.

Covid Tracker App | **Code** | **Preview**
- This project was built using React, Sass, and Git
- I learned how to make requests to a covid data api

Password Manager Service Webpage | **Code** | **Preview**
- This project was built using React, Sass, and Git
- I learned about components and how to incorporate them into a webpage.

Achievements:

CodeTN- 2019 Competition
- Placed top 3 in state of Tennessee
- Prompt was to create a website that impacted the community in a positive way.
- I designed and developed the front end and functionality of the website
- I learned how to communicate with backend developers and to make changes based on feedback

Education:

Farragut High School
GPA: 4.42 / 4.0
